gReminder provides you with an **automated Voice & Text patient communication platform** built right into the gPM suite to keep your patients informed and on-time for their scheduled appointments.

FEATURES

Remind your patients of their scheduled appointments by Phone (Voice) and SMS (Text). Obtain appointment confirmation in real-time

Inform patients of the provider, date, time and place of their appointment as well as any special instructions you wish to deliver when they pick up the phone

Patient can confirm, re-schedule or cancel in real-time over the telephone or by replying to a SMS/Text. Your gPM appointment schedule automatically updates

Detects for voice mail vs. live person – if a voice mail is detected, a voice message is dropped with detailed information about the appointment

Professional voice talent, all your messages are professionally recorded. With tailored messaging to each of your offices. Available in English & Spanish

Tailored text/SMS confirmations to address your practice's unique requirements

Check appointment confirmation activity from gPM and by accessing the online gReminder Web portal for detailed Call/SMS activity in real-time

View active providers from gReminder online web portal

Increase productivity of your staff by allowing them to focus on more immediate tasks and patient care

Decrease lost revenue resulting from "no-shows" or late arrivals
